

## Building Management Systems Module

Helping hoteliers tackle the energy crisis; save energy, reduce costs and be more sustainable with automatic shut down of power to rooms when not occupied.

Across the globe, hoteliers are spending huge amounts of money on energy! We can help.

The **iLink-BMS** module integrates your Building Management System to your property Management system to automatically close power in guest rooms as soon as they become unoccupied.

### Generate huge savings on energy costs

Industry research suggests 1 in 4 hospitality business fear closing\* due to escalating energy costs. Heating, ventilation, air conditioning and lighting account for up to 45% of a hotel's energy usage, the **iLink-BMS** module replaces the key card slot to fully automate the delivery of power to the room, giving the potential to save thousands.

Shutting down electricity to your rooms once guests have checked out is equivalent to adding \$1.35 to the room rate\*\*. Act now and save thousands, and help achieve sustainability targets!
